OBJECTIVE

Senior Software Developer with 5+ years of hands-on experience building production-ready APIs, scalable web applications, and AI-powered systems. Specialized in Python backend development with Django and FastAPI, with additional experience in .NET, React, Next.js, and modern cloud infrastructure. Experienced in designing reliable backend architectures, deploying production applications, and integrating machine learning models into real-world products, from LLM-powered platforms to real-time applications.

WORK EXPERIENCE

Python Developer & DevOps | **PartCAD**
UNITED STATES, 12/2024 - 04/2026

- Developed and maintained Python 3.10+ packages for the PartCAD project.
- Implemented asynchronous operations using `asyncio` to manage complex part relationships and repository synchronization.
- Applied object-oriented programming principles to model parts, assemblies, dependencies, and their relationships.
- Designed extensible and maintainable software components to support complex hardware package and workflow management.
- Managed CI/CD pipelines using GitHub Actions to automate builds, testing, and deployment workflows.

Junior AI/ML Engineer | **John Galt Solutions**
UNITED STATES, 10/2023 - 12/2024

- Developed and integrated LLM-powered applications using Python and API-based model inference.
- Implemented RAG pipelines for document ingestion, text chunking, embedding generation, and semantic retrieval.
- Built conversational AI workflows that incorporate retrieved context into prompts to generate grounded responses.
- Designed backend services and API integrations to connect language models with application data and business logic.
- Implemented prompt engineering and context management strategies to improve response relevance and reduce unsupported outputs.

Django Developer | **Attalos**
UNITED STATES, 11/2022 - 10/2023

- Developed and maintained backend services using Django for Attalos, a marketplace profitability monitoring platform.
- Designed scalable database models and APIs to process and aggregate large volumes of order-line data.
- Implemented business logic for calculating order-level and marketplace profitability metrics.
- Integrated third-party services to synchronize marketplace orders, product costs, and related data.
- Optimized data processing and aggregation workflows to support accurate profitability reporting and analytics.

Web Developer | **Eskalate**
ETHIOPIA, 02/2023 - 04/2023

- Developed backend services and RESTful APIs using C# and ASP.NET Core for a ridesharing platform.
- Designed relational database schemas and data access layers to manage users, drivers, rides, bookings, and trip histories.
- Implemented ride lifecycle management, including ride requests, driver assignment, trip status updates, and cancellations.
- Built authentication and authorization mechanisms to secure APIs and enforce role-based access for riders and drivers.
- Integrated real-time ride updates and driver availability workflows to support coordination between riders and drivers.
- Optimized database queries and backend operations to support efficient ride processing and responsive API performance.

Backend Engineer | **Nexus Technologies**
ETHIOPIA, 03/2021 - 11/2022

- Developed backend services and RESTful APIs using NestJS, Flask, and Django REST Framework across multiple applications.
- Implemented Kafka-based event-driven workflows for asynchronous processing and reliable handling of high-volume data.
- Designed and integrated secure, scalable APIs for communication between services and external systems.
- Developed PostgreSQL-backed data models and query logic for user interactions and content management features.
- Integrated the OpenAI API to support automated content generation and AI-powered recommendation features.
- Implemented backend business logic and service integrations to support scalable application workflows and data consistency.

EDUCATION

Addis Ababa Institute of Technology, Software Engineering(AI Stream) | **Bachelor of Science**
ADDIS ABABA, ETHIOPIA, 10/2019 - 07/2024

SKILLS

- **Programming Language** : Python, C#, C++, Java
- **Database** : PostgreSQL, MySQL, MongoDB
- **Backend** : Django, FastAPI, Flask, ASP.NET
- **ML Frameworks** : Pytorch, TensorFlow, NumPy, Triton
- **DevOps** : Docker, Kubernetes, GitHub Actions
- **Frontend** : React.js, Next.js,Typescript, Tailwind
- **Caching** : Redis, RabbitMQ, Apache Kafka
